GOVERNMENT PROCUREMENT SOLUTIONS

eProcurement Management System

A secure, cloud-based bid and tender management platform purpose-built for South African government supply chain operations.

Platform Overview

eProcurement digitalises the full procurement lifecycle for government SCM units — from publishing tender notices and managing bidder queries to secure document storage and audit trail compliance. It replaces paper-based processes with a centralised system that promotes transparency, accountability, and efficiency.

Core Capabilities

Bid & Tender Management

Manage bids through Draft, Open, Closed, and Archived stages with category support for briefing registers, closing registers, and appointments.

Bidder Communication

Structured query threads between bidders and SCM officials with private/public visibility, read tracking, and email notifications.

Audit & Compliance

Full download audit trail with date filtering, CSV export, and a built-in SCM document library for compliance templates.

Bidder Self-Service Portal

Bidders register, verify via email, browse tenders, download documents, and submit queries without admin intervention.

Role-Based Access Control

Four roles with 14 capabilities ensure SCM managers, officials, unit managers, and bidders access only what they need.

Secure Document Storage

AES-256 encrypted cloud storage with MIME validation. Supports multiple providers with automatic local fallback.

Full Transparency

Every download, message, and status change is logged and auditable

Reduced Turnaround

Digital workflows replace manual paper-based processes and delays

PFMA & MFMA Ready

Built for South African public finance compliance requirements

MYBLISS TECHNOLOGIES

EPROCUREMENT PLATFORM

Bid Lifecycle

Draft — Prepare details, upload documents → **Open** — Published to bidders, queries enabled → **Closed** — Submission deadline passed → **Archived** — Record retained for compliance

User Roles & Permissions

Role	Permissions
SCM Manager	Full management — create, publish, close, archive bids; manage contacts, bidders, settings; view audit logs
SCM Official	Operational duties — create and edit bids, respond to queries, upload documents
Unit Manager	Read-only oversight — view bids, messages, and download logs
Bidder	Self-service — browse tenders, download documents, submit queries, manage profile

Security & Notifications

Security

- AES-256-CBC file encryption
- Role-based access (14 capabilities)
- Nonce-verified requests
- XMLRPC disabled, enumeration blocked
- 50 MB limit with MIME validation

Notifications

- Email verification for registration
- Configurable query/reply/status alerts
- Per-bidder notification preferences
- SMTP support (any email provider)

Built-In Compliance

- Full download audit trail with CSV export
- Bid status change logging
- Transparent bidder communication records
- SCM document library for policies
- Encrypted file storage
- Role-based access prevents unauthorised actions
